

ILLUSTRATED CATALOGUE

OF

THE FLEETWOOD SCROLL SAW.

Scroll Saws and Scroll Saw Material,

ATHLETIC AND THEATRICAL GOODS.

MANUFACTURED AND SOLD BY

Edward H. Moody, Hartford, Conn.

1. All orders must come from the Catalogue, and must be sent from the State and Territory in which the order is made, and the next issue of the Catalogue will be the right to charge any price to meet the demand without notice.

HOW TO ORDER.

IN ORDERING GOODS FROM THIS CATALOGUE BE CAREFUL TO OBSERVE THE FOLLOWING RULES.

Address your letter carefully.

Send me your name, state, city, street and number.

Do not send silver coin in letters as it breaks through the envelope.

Postage stamps accepted in payment of goods up to one dollar; one and two-cent stamps preferred. Foreign stamps not taken.

Remit by draft, post-office order, or registered letter. These methods save you the express charges for returning us the money C. O. D. All goods sent C. O. D. will have return charges added to the bill.

I cannot be responsible for money sent in letters in any other than by one of the three ways mentioned above. If you send your money in any other way, you do it at your own risk.

Postal Notes can be obtained for sums less than five dollars at all Post-Office Money Order Offices. The Postal Notes are payable to bearer, and therefore are not so safe as a Money Order. Patrons must therefore assume the risk of sending them.

In ordering by mail enclose stamps for postage, unless the goods are marked post-paid on our catalogue.

Packages can be registered for ten cents each. I am not responsible for goods sent by mail, not registered.

Should your orders not receive prompt attention, please write again as mistakes are liable to occur.

In ordering designs, give name of publisher as well as number of design, as several publishers have the same numbers on their designs.

CANADA ORDERS.

All merchandise sent to Canada weighing from 2 to 8 ounces require 10 cents extra for postage. Any merchandise weighing under 2 ounces can go at the rate of 2 cents for every half-ounce. No article weighing over 8 ounces can be sent by mail to Canada except designs, which I send post-paid. No Canada bills or stamps received. Send U. S. Money or registered letter.

The firm of Fisk & Moody has been dissolved, Mr. Fisk retiring to engage in other business, consequently all future orders and remittances should be made to EDWARD H. MOODY.

I take pleasure in announcing to the customers of Geo. M. Way & Co., that I have purchased their Scroll Saw department, with their names and good will, and have removed to my new store, affording more extended facilities for minute attention to my increasing business.

My goods are guaranteed to be equal, and many of them superior to any in the market, and any goods not proving as represented in my catalogue may be returned and money refunded.

Thanking you for past favors, and soliciting a continuance of your patronage, I remain,

Yours Respectfully,

Edward H. Moody.

Hartford, Conn., Nov. 9th, 1894.

No Goods can be substituted in any of these offers.

➤ A Grand Chance. ➤

To any one sending me \$15.00 or more for Scroll Saws or Scroll Saw Material, at retail prices, (Premium offers not included), from Nov. 1, 1884 to Nov. 1, 1885, I will give them a beautiful \$5.00 Magic Lantern with 12 slides and directions. I will deliver this free of charge to any part of the U. S. The amount, \$15.00 may be sent at one time or at different times. I keep a careful record of all orders sent me, and will inform you when you have sent \$15, in case you do not take advantage of this offer when it is due you.

You may wonder how I can give such liberal Premiums, and to you I would say that my motto in business is:

" Quick Sales and Small Profits."

DEXTER "C."

FLEETWOOD.

**SWING BETWEEN SAW AND FRAME,
15 INCHES.**

This cut represents the No. 3 Fleetwood machine complete. It is graceful in form, finely finished and carefully made, only the best material being used in its construction. Besides a scroll saw it has a perfect beveling table and blower, and power drill with patent chuck.

The saw clamps are attached to steel spindles which run in guides, thus giving it a perfectly true up and down cut, with no side play.

A lathe cannot be attached to this machine.

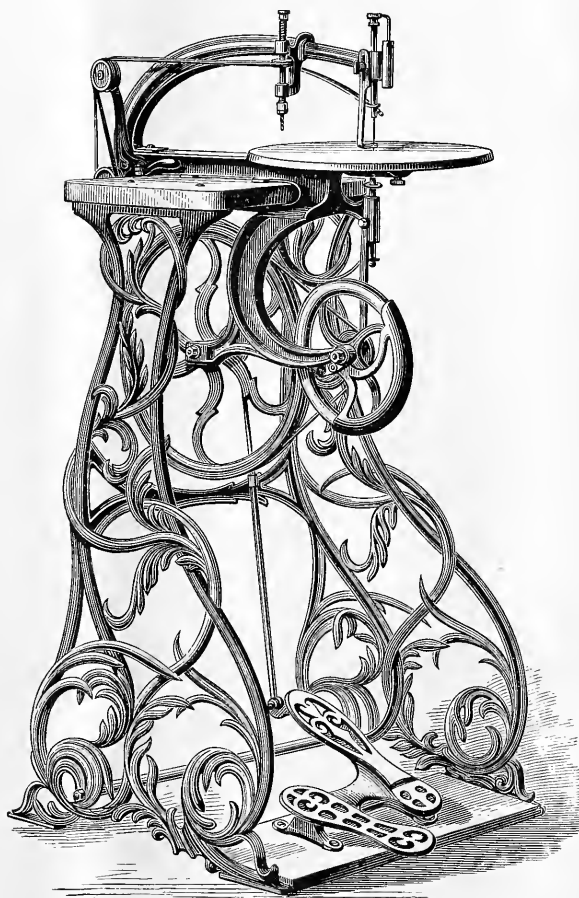

No. 3 Machine, complete (see cut),.....	\$22 50
No. 3 Machine, complete, plain stand.....	21 00
No. 3 Machine, without stand, blower and drill,.....	13 50
Drill attachment alone,.....	3 50

Blower.....	50
Clamps per pair.....	50

DEXTER "C" SCROLL SAW.

SWING BETWEEN SAW AND FRAME, 16 3-4 INCHES.

All wishing a first-class machine at less price than the "Fleetwood" will find it in the Dexter "C." This is finely made; is easy running, fast cutting, convenient and beautiful machine, and all parts are so carefully fitted that it is noiseless. It has a superior beveling table to do inlaid work, and an upright power drill.

Complete (see cut), with 3 drills and $\frac{1}{2}$ dozen saw blades.....	\$13 00
Without boring attachment.....	11 50
Boring attachment alone, with 3 drills.....	2 00

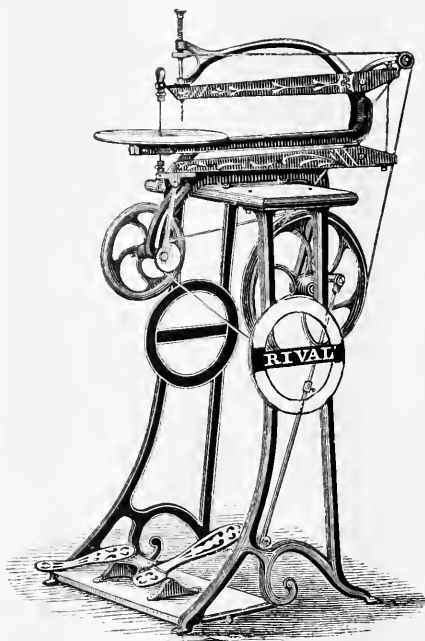

TEN ECK N.Y.

THE FLEETWOOD.

THE RIVAL SCROLL SAW.

PATENTED.

This machine for beauty of design, simplicity of construction, and for practical use, far excels any ever offered for the price.

All material used in its construction is of the best quality and is finished in a first-class manner.

It has a Patent Tilting Table with hollow ball joint, through which the saw passes, the only table made that can be changed or tilted to any position for sawing inlaid work.

It has a Patent Saw Clamp, and will hold firmly any width of saw, from the finest to the coarsest.

It has an upright Drilling Attachment, a very valuable feature, and I guarantee cannot be found on any other Saw for the price in the market. The Drill Chuck will hold from No. 60 to No. 45 Morse Twist Drills.

The table is polished and nickel plated.

The arms swing $16\frac{1}{2}$ inches between the saw and frame.

RIVAL Scroll Saw, Complete (nickel plated tilting table), with drill attachment, stand, double foot treadle, $\frac{1}{2}$ doz. extra saw blades, twist drill and wrench, all set up and crated ready for shipment, \$10 00

THE RIVAL LATHE.

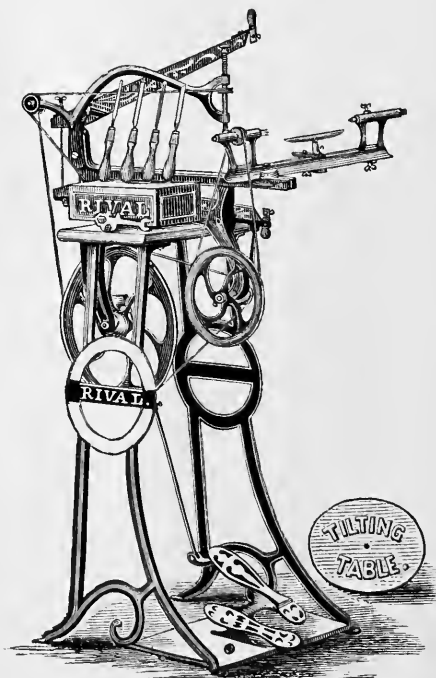

This Lathe can be attached to the saw in one minute, ready for use. This is a very handy and useful attachment for the Rival Saw and is sold extra.

It is provided with Iron Ways and Rests and Steel centers, Face Plate, etc., and will take work 9 inches long, and 4 inches in diameter.

It has a solid Emery Wheel for grinding and polishing, also a set of three best steel turning tools and a screw-driver, all packed in a nice box ready for shipment.

The accompanying cut shows the Rival Saw with Table removed and the Lathe attached ready for use.

Price, Rival Lathe, \$3.00

AMATEUR SAW, NO. 6.

SWING BETWEEN SAW AND FRAME, 16 INCHES.

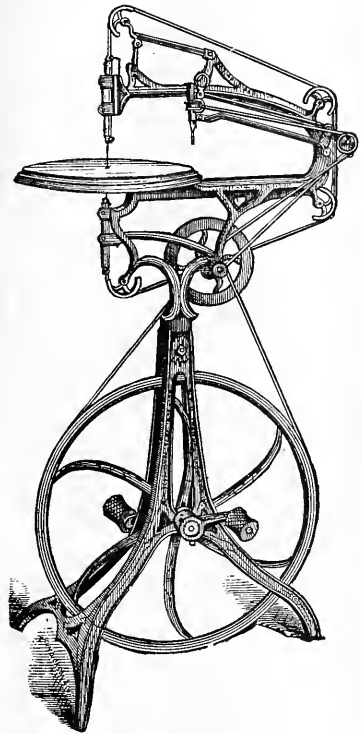

The spindles which hold the saw blades run in guides above and below ; it has a perfect blower, drill and beveling arrangement for inlaid work.

I especially recommend this machine to those having weak ankles or those preferring the velocipede movement. It is strong, durable, finely finished and runs very easy.

PRICES.

Complete (see cut),.....	\$12 00
Without drill,.....	10 00

AMATEUR, NO. 6.

NEW ROGERS.

SWING BETWEEN SAW AND FRAME, 17 1-2 INCHES.

The Rogers Saw is well made and finished and is sure to please all who wish a cheap scroll saw without lathe.

PRICES.

No. 1.	Japanned Table, no emery wheel,	\$3 50
No. 2.	Nickeled " solid " (see cut)	4 00

THE CHALLENGE SCROLL SAW.

PATENTED AND IMPROVED.

FOR FOOT OR POWER.

The Patent Tilting Table, with hollow ball joint, through which the saw passes, is the only table made that can be changed or tilted in any position for sawing inlaid work.

The Patent Saw Clamp is the best in use, as it will hold firmly any width of saw from the finest to the coarsest.

The Upright Drilling Attachment, with improved Drill Chuck will hold from No. 60 to No. 45 Morse Twist Drills.

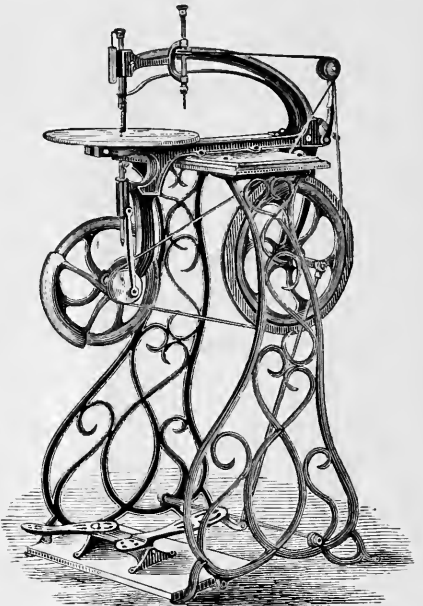

The Improved Dust Blower is very valuable, as it works perfectly and keeps the lines of the work free from saw-dust.

The Large Double Grooved Driving Wheel by which the saw is easily run, is driven by a $\frac{3}{4}$ inch round belt, fitting the groove nicely and doing away with any slipping or lost motion. Can furnish a wheel with tight and loose pulleys for power when desired.

This Machine is easily managed and not liable to get out of order, and is recommended to amateurs, model-makers, printers, jewelers, shell-workers and all who desire a first-class machine, suitable for every description of light scroll-sawing in wood, bone, shell or metal.

It will cut wood $1\frac{1}{2}$ inches and under, rapidly, and will swing 15 inches between saw and frame.

The Spindles, Spring and Bearings are made of the best tempered steel and all material used in its construction is of the best quality and every part fitted together with the nicest precision. It presents a handsome appearance and only requires a brief trial to convince all of its superior merits.

NO. 1 CHALLENGE SCROLL SAW.

PRICE LIST.

To Avoid Mistakes Order by Number.

No. 1.	Challenge Scroll Saw (nickel plated), Complete, with Fancy Stand, Drill attachment, Tilting table, Double Foot Treadle, Blower, Presser Foot, $\frac{1}{2}$ dozen extra Saw Blades, Twist Drill and Wrench, all set up and crated, ready for shipment,.....	\$20 00
No. 2.	The same as No. 1, without Stand,	16 50
No. 3.	The same as No. 1, without Stand or Drill attachment,.....	13 50
	Driving Wheel, with tight and loose pulleys for power, for Nos. 1, 2 or 3 machine, extra,	3 00
No. 4.	For Power only, has Tilting table, Presser Foot, Blower, etc. A very desirable machine for manufacturing purposes. Set up and crated ready for shipment,.....	10 00

For Cut and description of No. 4, see next page.

CHALLENGE LATHE.

THIS LATHE CAN BE ATTACHED TO THE SAW IN THE SAME MANNER AS THE TABLE.

This is a new and ingenious Lathe Attachment for the Challenge Saw and is sold extra. Parties very frequently desire to finish Scroll work with the addition of small

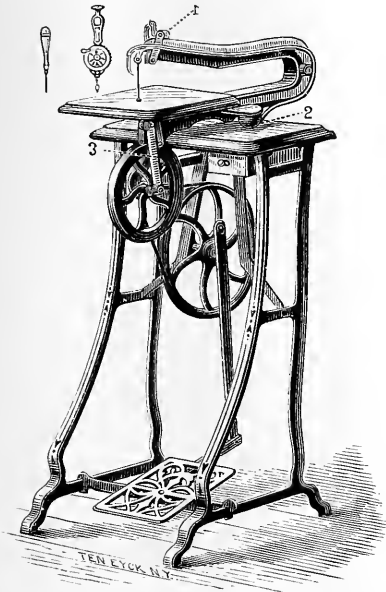

turned ornaments,—in fact some of the designs of Ornamental work require the use of the Turning lathe to make them. It is made of iron and steel; length of bed, 18 inches; distance between centers, 11 inches and swings 4 inches; rests 4 and 8 inches.

It has a solid Emery Wheel for grinding, and polishing tools, metals, etc. The head has a spindle of steel, nicely fitted with Face Plate, Spur Center, etc. The Tail Stock has a Screw Spindle of steel, with Wheel, etc. With this Lathe Attachment I furnish a set of the best steel turning tools, and a screwdriver all packed in a nice box ready for shipment.

Price, Challenge Lathe, \$5.00

THE HOUSE SAW.

SWING BETWEEN SAW AND FRAME, 15 1-2 INCHES.

The House Scroll Saw has been enlarged and improved this Fall. It now swings 15½ inches instead of 13 inches which makes it one of the most desirable and durable machines now made.

The arms are made of steel, all in one piece, consequently it makes the most powerful cutting saw ever made, with no side or lost motion, and I will guarantee it to break less saw-blades and to cut faster than any saw ever invented. It is also the easiest running machine made.

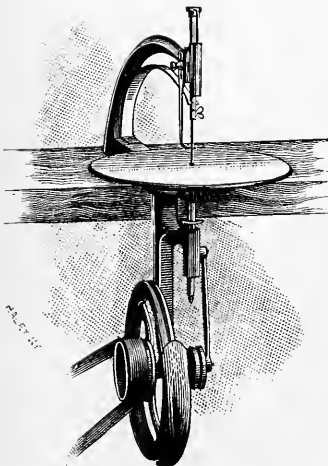

The perfect working positive blower is also an improvement.

There is no power drill on this saw, so I give with it free of charge, one of my Popular Hand Drills on page 14, and to give you a bargain, I will throw in the small screw-driver for fine screws, on page 16, and \$1 worth designs, my own selection. For those wishing a Scroll Saw better than the New American, I can heartily recommend this machine.

Price, Complete, boxed for shipment, \$8.00.

CHALLENGE SCROLL SAW.

FOR POWER ONLY.

This is a new and cheap arrangement of the Challenge Scroll Saw, for power.

It is easily fastened with Screws or Bolts to a work bench or any place desired; takes but little room, and is a very desirable machine for manufacturing purposes, &c., &c.

It is driven by a one inch flat belt; has the same capacity for cutting, etc., as the No. 1 Machine, but has no drilling attachment.

The Challenge Lathe Attachment can be used on this machine.

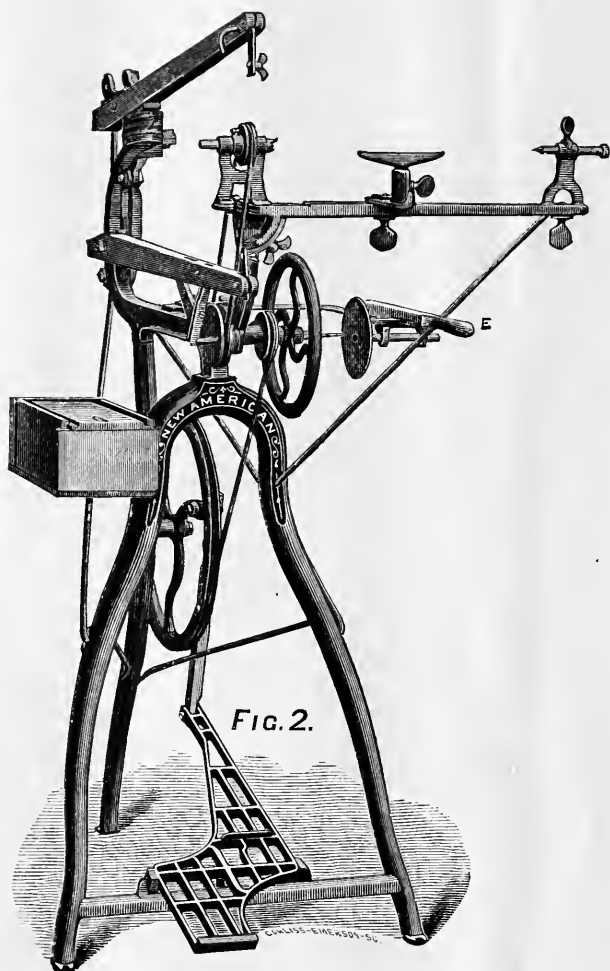

List Price.

No. 4 Challenge Scroll Saw (Nickel Plated), with Tilting Table, Presser Foot, Blower, etc., one-half dozen extra Saw Blades and Wrench, set up and crated ready for shipment, \$10 00

No. 4. For power only, \$10.00.

THE NEW AMERICAN.

SWING BETWEEN SAW AND FRAME, 20 1-4 INCHES.

PRICE LIST.

Scroll saw, lathe, set of turning tools, wrench, screw-driver, oil can, 1 Morse twist drill, twelve saw blades, assorted sizes, 1 large blade $\frac{3}{16}$ inch wide, and \$2.00 worth designs of my own selection,.....

\$ 8 00

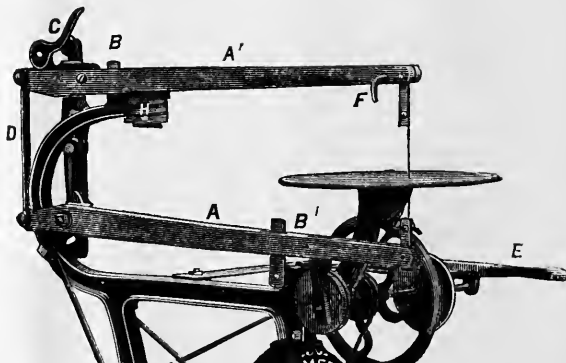

Same, without lathe and turning tools,.....

6 00

THE NEW AMERICAN is the most popular saw made, as it is low in price, is the strongest arm-movement saw made and is so adjustable that it will do the finest or coarsest work by simply sliding the lower arm backward or forward which can be done to no other machine.

The iron guides (B and B1) pass through the arms (A and A1), thus preventing any side motion. The bellows (H), give a constant stream of air through the hollow arm (A1), and passes out at (F). The lever (C) gives any tension to the blade by simply throwing it back.

In selecting a scroll saw, always be particular to get one with a long swing, otherwise you will have to cut your wood into small pieces in order to swing it.

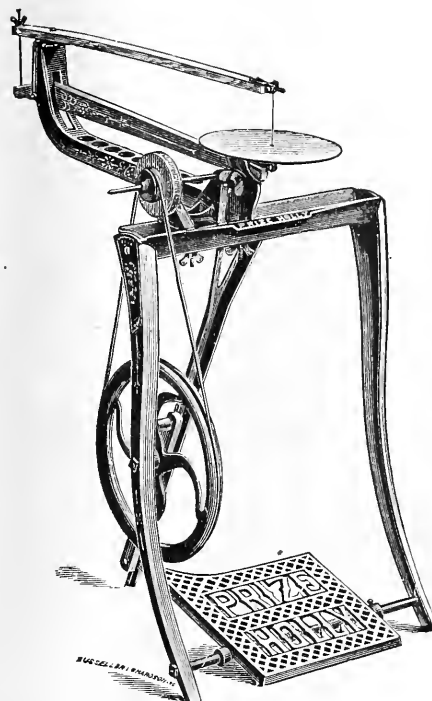

PRIZE HOLLY.

SWING BETWEEN SAW AND FRAME, 20 INCHES.

This is the cheapest combination saw made. The lathe will turn 10 inches long and 4 inches in diameter.

Price, complete, includes lathe, 3 turning tools, scroll saw, tilting table, drill and emery wheel..... \$5 00
 Scroll Saw without lathe, 3 00

PRIZE HOLLY.

PRIZE DEMAS.

SWING BETWEEN SAW AND FRAME, 20 INCHES.

The Demas is larger and will do heavier work than the Holly. The lathe will turn a piece 16 inches long and 5 inches in diameter.

Price, complete, consists of Scroll saw, lathe, 5 turning tools, tilting table, emery wheel, power drill, 12 saw blades, 3 drill points and 30 designs..... \$8 00
 Without lathe and turning tools, 5 00

PRIZE DEMAS.

The above goods are post-paid.

FANCY WOODS FOR SCROLL SAWING.

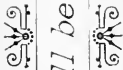

READ BEFORE ORDERING.

THE greater part of my customers, especially those at a distance, are unacquainted with the color and grain of the different woods, so for the benefit of those who wish to get other woods than Walnut or Holly, I will send post-paid, on receipt of 15 cents, samples of my wood. This will help you in selecting and also give you a chance of seeing that my wood is finely planed and of superior quality.

On orders for wood amounting to \$2.00 or over, I will make a discount of 5 per cent.

No Wood will be sent by Mail.

WOOD BY THE SQUARE FOOT.

Sandal, . . .	45	...	50

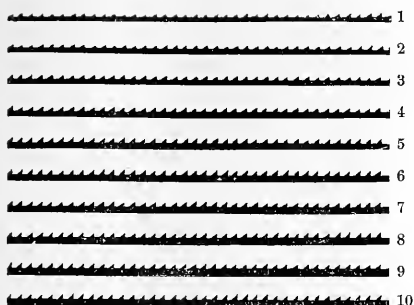

No Wood will be sent by Mail.

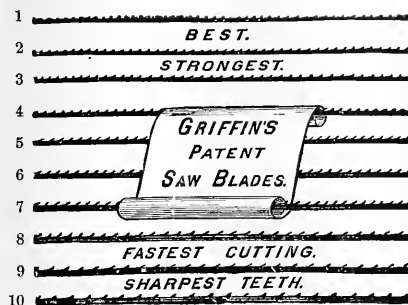

I can send Black Walnut or Oak in 2, 3, 4 or 6 foot lengths; all other woods are cut in 2 ft. lengths.

I have on hand about 500 feet $\frac{3}{16}$ Holly that is second grade and will sell it off for 4 cents a foot. It will pay you to order a few feet when sending for other woods, as it will be just the thing to ebonyize or to back up some dark wood. I offer it at this low price, which is less than half what it cost, to make room for other woods and for the reason that I wish to keep no second-class wood of any kind in stock. I guarantee my wood to be as good and as smoothly planed as any in the world, and all wood will be shown me by my clerks before it is shipped to you, and I shall allow none to leave the store that is not first-class.

❁ SCROLL SAW BLADES. ❁

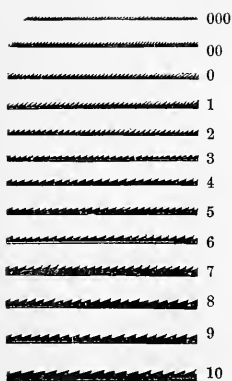

STAR BLADE.

GRIFFIN BLADE.

THE most important article needed in Scroll Sawing is the blade. If you use a poor, cheap blade, you are liable to spoil the wood, design,—and your temper. I do not recommend any except the “STAR” and “GRIFFIN,” but keep the best quality German blade for those who wish it. The price is the same on all kinds and if you are unacquainted with the different kinds, I should advise trying some of each. The sizes in all makes run from No. 000 to 10, but you will find Nos. 1, 2 and 3 the best for ordinary sawing. I do not sell less than one dozen blades.

PRICE LIST.

Any size from No. 000 to No. 6,	per doz.,	.10
“ “ 000 “ 6,	per gross,	\$1.00
“ “ 6 “ 10,	per doz.,	.15
“ “ 6 “ 10,	per gross,	1.50

CLOCK MOVEMENTS.

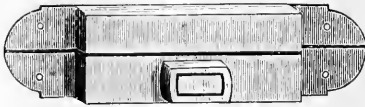

**No. 1.****No. 2.****No. 3.**

Note.—All my clock movements are made by the Seth Thomas Clock Co., and are warranted to be perfect and keep good time. I do not keep the eight day marine movement as it seldom gives good satisfaction. It gains time the first four days and loses the last four. I keep in stock the 8 day Cuckoo clock movement for Russell's design, Number 218, but it is not made by the Seth Thomas Clock Company, and I do not warrant it except to be all right and in working order. When you order clocks, please state what clock-case you want it for, as I have different size dials and pendulum rods to fit the case. When you make a clock frame, do not fasten the back until you have put in your clock movement.

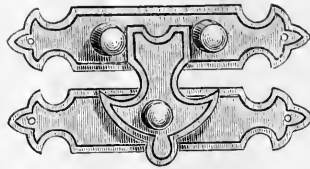

No. 1.	8 day, ½ hour strike, pendulum movement, 5 inch, nickel sash and dial,	\$3 50.
No. 1.	" " " " " without dial,	3 00.

LAWN TENNIS

ALL TENNIS GOODS NOT MAILABLE WILL BE MARKED WITH A STAR.

"THE FRANKLIN." No. 13.

Patented Feb. 12, 1884.

This new Racket has at once sprung into popular favor among expert players. The construction of the beveled frame produces an extra large face, with reliable stringing and light weight. They are all made full size, face 8 x 11½ in. and in weights varying from 12 to 16 oz., 13½ to 14 oz., being the best weights for the general demand.

Price, each, with cedar handle,..... \$5.50
 " " inlaid " 7.50

"THE CLUB."

The "Club" Racket is very popular with Tennis players who desire a smaller head racket than the "Franklin." Size of head, 7½ x 11 in. Weights from 12 to 16 oz.

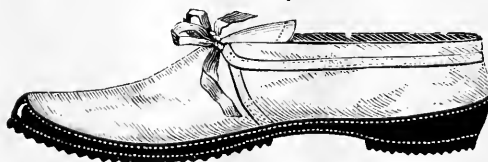

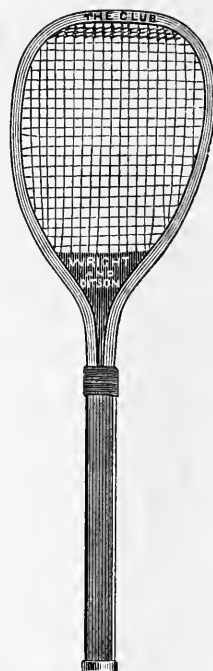

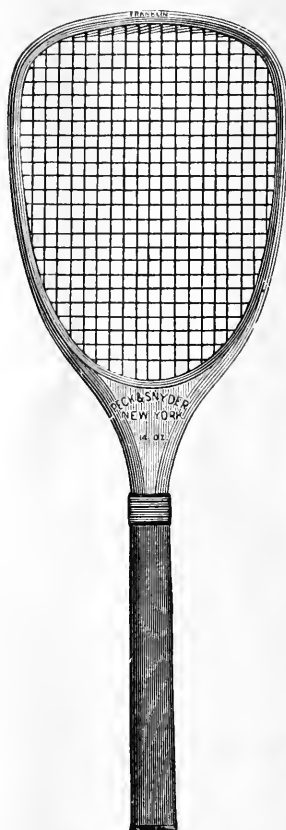

Price, each, with cedar handle,..... \$5.50
 " " cork " 6.50

"THE CHARTER OAK."

THE ATTENTION OF OARSMEN AND THE PUBLIC
 IS CALLED TO

THE EUREKA HARLOR ROWING MACHINE.

THIS MACHINE gives the exact representation of rowing. It is the Sliding Seat Motion, and its propelling action is with an elastic rebound. It is simple in construction and durable, and packs so small that it can be moved over in 10 or 15 minutes. It can be set up and worked in any bedroom. It is excellent for children to train and practice on, when the weather or any other cause prevents them from using the river. A beginner can learn on it to good advantage, as well as more advanced rowers, and physical development. By shifting the damper, it can be adapted to the strength of any person, or used by a child 5 years of age. It has been used by a great number of ladies, and is of great benefit to their health. It has been adopted by athletes and recommended by physicians generally, and is the most economical and perfect machine ever made.

Price Complete, \$10.
